# SAFETY BULLETIN ALERT!

Attention all Gantry, RMG, RTG,  
Top Picks, & Container Handlers

When lifting off of Bombcarts, lift very gently  
at first and ensure the can is fully free from  
the Bombcart before hoisting at full speed.

Recent back-to-back accidents illustrate the  
importance of ensuring the container does not  
get caught up on the chassis and lift the entire  
Bombcart off the ground. Thank you.

In solidarity  
Local 500 Safety Committee  
and Officers
