**LOCAL 500 BULLETIN**

---

# **Anyone Removing or Tampering With Safety Bulletins is Subject to Immediate Deregistration**

(i.e. DP World Wind Policy)

Anyone removing or tampering with Safety Bulletins is subject to immediate deregistration.

Recently, the Chair of the Local 500 Safety Committee **agreed to a variance of the DP World policy on shutdown of equipment for wind.** New bulletins on the policy were posted by the employer. Someone has been taking them down and posting the old bulletin.

**This is totally unacceptable.** if you have a problem with the new policy bring your concerns forward to the Local Safety Committee.

In solidarity
